**Help other people  
Change the world..**

## Good Deeds

### Background

Students perform good deeds or services for their community without expecting anything in return except to draw a smile on the faces of others.

### Community Service in Islam:

Islam has given great emphasis to community service.

There are a lot of Hadeeths (Sayings) by Prophet Mohammed (PBUH) encouraging community service and putting it at level with other important orders for Muslims to follow.

People who serve their community in Islam are promised with the greatest rewards.

## Suggestions:

There are two ways in which you can serve your community:

### First Way:

Through financial contribution to Charity Societies and Needy people.

### Second Way:

Moral Support through helping others with actions and kind words.

**Remember:** The idea behind all these should be spiritual rewards and not any human gain.

For more information about the program, contact Mrs. Ameera Balushi or Student members in the school.

## Advantages of Community Service:

1. Encourage cooperation between society members.
2. Using spare time in good ways.
3. Helping in the fight against poverty in the local community and the world.
4. Provides youths with beneficial causes to keep them away from harmful habits.
5. Creates good awareness of the good causes versus the bad causes.
6. Train people on loving others and avoiding selfishness.
